

KEN NEUHAUSER

June 2008

Ken Neuhauser, LEED® AP and certified HERS rater, will work with developers, builders, design professionals, and homeowners on energy efficient, durable, and healthful building practices.

Ken comes to us after working as an Architectural Project Manager developing an energy efficiency program for the mid-to-high-rise residential sector with CSG where he was also the founding program manager of the Applied Building Science group. His expertise derives from a thorough understanding of thermal and ventilation performance in buildings and includes pressure diagnostics, plans analysis, energy modeling, in-field inspections and instrumented testing. He worked extensively on implementation of the EPA's Energy Star Homes Program, providing technical support on building analysis, field inspections, diagnostic testing, and application of building science theory. As a multifamily specialist, he contributed to design and application of multifamily new construction programs. His background in architecture focused upon affordable housing and community development.

Education

University of Michigan
College of Architecture and Urban Planning
